By Reginald H. Garrett, Charles M. Grisham : Principles of Biochemistry With a Human Focus has tutorials and problem sets for learning biochemistry cell developmental human and molecular biology mendelian genetics and immunology compendium of all course descriptions for courses available at reynolds community college Principles of Biochemistry With a Human Focus:

1 of 1 review helpful Eh Okay By Rosekeet The first issue I have with this book is the quality of the figures Some of them are fuzzy blurry as if they were copied and pasted at low resolution The little CD icon is really fuzzy I feel that for such a high cost book the quality of the figures should be higher Also there is no glossary There are words in bold but no glossary to look them up it This really irrit PRINCIPLES OF BIOCHEMISTRY WITH A HUMAN FOCUS

provides pre med junior and senior science majors the most up to date coverage of biochemistry and a distinct focus on the topics most relevant to human health and medicine Written by a chemist Grisham and a biologist Garrett the book presents biochemistry from a balanced perspective PRINCIPLES OF BIOCHEMISTRY stresses the principles governing structure function and interactions of biological molecules PART I MOLECULAR COMPONENTS OF CELLS 1 Chemistry is the Logic of Biological Phenomena 2 Water The Medium of Life 3 Thermodynamics of Biological Systems 4 Amino Acids and Polypeptides 5 Proteins Secondary Tertiary and Quaternary Structure 6 Lip
