By Irving R. Epstein, John A. Pojman : An Introduction to Nonlinear Chemical Dynamics: Oscillations, Waves, Patterns, and Chaos (Topics in Physical Chemistry) charles e schmidt college of science course descriptions biological sciences chemistry and biochemistry complex systems and brain sciences ce 201 earth materials and processes 2 3 4 earth materials structure of solid earth rock cycle common rock forming minerals types of rocks and its An Introduction to Nonlinear Chemical Dynamics: Oscillations, Waves, Patterns, and Chaos (Topics in Physical Chemistry):

Just a few decades ago chemical oscillations were thought to be exotic reactions of only theoretical interest Now known to govern an array of physical and biological processes including the regulation of the heart these oscillations are being studied by a diverse group across the sciences This book is the first introduction to nonlinear chemical dynamics written specifically for chemists It covers oscillating reactions chaos and chemical pattern formation and in Offers an introduction to nonlinear chemical dynamics written especially for chemists covering oscillating reactions chaos and chemical pattern formation Begins with a brief history of nonlinear chemical dynamics and a review of necessary mathematics and
