1 of 1 review helpful very basic book By chemstudent def not worth 24 full price thank goodness i only paid 7 for it

good for a very basic introduction to spectroscopy 0 of 1 review helpful Five Stars By SRIPATHY GOOD BOOK 0 of 1 review helpful Five Stars By Elizabeth Lor Super helpful This up to date account of key areas in modern organic spectroscopy describes the four major instrumental methods used routinely by organic chemists ultra violet visible infra red nuclear magnetic resonance spectroscopy and mass spectroscopy It provides a concise introduction to the physical background of each describing how molecules interact with electromagnetic radiation or how they fragment when excited sufficiently and how this information may be applied to t it could be extremely valuable to Final Year students as a revision aid or to professional chemists wanting a quick refresher course Aslib Book Guide Vol 62 No 7 July 1997 From the Back Cover Modern spectroscopy
