By Giorgio Margaritondo : Elements of Synchrotron Light: For Biology, Chemistry, and Medical Research (Physics)

diamond light source is the uks national synchrotron science facility located at the harwell science and innovation campus in oxfordshire we operate cutting edge large scale facilities for studies in physics chemistry biology medicine applied science and a wide range of advanced Elements of Synchrotron Light: For Biology, Chemistry, and Medical Research (Physics):

This book is structured by two level presentation including a simple descriptive treatment and slightly more in depth discussions of specific topics The first level treatment covers the notions terminology and techniques that are required to use a synchrotron facility The book is therefore an ideal first step for all those beginning to use synchrotron light for their work or are considering it The treated topics include the basic functioning mechanisms of synchrotron The main text includes mathematical equations to describe how the synchrotron source generates light and also contains inset sections with further discussions of the mathematics and physics details There are plenty of figures and resources for further read
