By Nick Lane : Oxygen: The Molecule that Made the World (Popular Science) plastics oxygen is inside things made out of plastic every time you get a 2 liter bottle or a yogurt look at the plastic now you know there is oxygen inside all a beaten egg white can foam to eight times its original volume souffls angel food cakes and meringue all make use Oxygen: The Molecule that Made the World (Popular Science):

4 of 4 review helpful Real Science By fear of buying Scientists for the most part stick to peer reviewed confirmed and generally accepted theory in a book for the general audience Sadly this most often leads to didactic prose that conveys little of the excitement of scientific endeavor To dramatize the scope of the conclusion after it is reached Neal DeGrasse Tyson style is not the same Nick Lane draws find In Oxygen Nick Lane takes the reader on an enthralling journey as he unravels the unexpected ways in which oxygen spurred the evolution of life and death He shows how oxygen underpins the origin of biological complexity the birth of photosynthesis the sudden evolution of animals the need for two sexes the accelerated aging of cloned animals like Dolly the sheep and the surprisingly long lives of bats and birds Drawing on this grand evolutionary canvas From The New England Journal of Medicine Nick Lane the author of Oxygen studied biochemistry at the University of London and did his doctoral research on oxygen free radicals at the Royal Free Hospital in London but then left science to become the director of
