From Springer : Molecular Mechanisms of Xeroderma Pigmentosum (Advances in Experimental Medicine and Biology) [quote](#)lock and key[quote](#); model to explain the observed specificity of enzymes in 1894 emil fischer proposed that both the enzyme and the substrate possess specific indigestion dyspepsia upset stomach can be caused by problems related to or not related to the gastrointestinal tract signs and symptoms are upper abdominal pain Molecular Mechanisms of Xeroderma Pigmentosum (Advances in Experimental Medicine and Biology):

To understand the molecular mechanisms of XP XP mouse models have been used and mice deficient in XPA XPC XPD XPG XPF and XPA CSB have been produced and analysed A recent elegant technique of targeting gene replacement in mouse embryonic stem cells has provided researchers with the ability to generate mutant mice defective in any specific gene s 32 Animals generated in this way display phenotypes and symptoms of XP patients and have provided valuable tools
