1 of 1 review helpful Informative and infuriating By Molly Donald McNeil Jr is one of our top science journalists He covers global health issues for the New York Times and has reported on epidemics ranging from Ebola to West Nile McNeil visited Brazil during the early days of the Zika epidemic when the first cases of microcephaly appeared and interviewed researchers on flavivirus as well as local public administrators A gripping narrative about the origins and spread of the Zika virus by New York Times science reporter Donald G McNeil Jr Until recently Zika once considered a mild disease was hardly a cause for global panic But as early as August 2015 doctors in northeast Brazil began to notice a trend many mothers who had recently experienced symptoms of the Zika virus were giving birth to babies with microcephaly a serious disorder charac I find much to applaud in Mr McNeil rsquo s Zika The Emerging Epidemic Though slim hellip Zika is dense with information hellip In a no nonsense declarative writing style Mr McNeil tells the history of humanity rsquo s relation
