From Elsevier : Biophysical Characterization of Proteins in Developing Biopharmaceuticals 1 introduction11 biosimilar proteins and glycoproteins in europe definitions and status the clinical and commercial success of biologic derived drugs is immunoglobulin g igg has an unusually long serum half life in comparison to proteins of similar size it is well known that this phenomenon is due to iggs Biophysical Characterization of Proteins in Developing Biopharmaceuticals:

Biophysical Characterization of Proteins in Developing Biopharmaceuticals is concerned with the analysis and characterization of the higher order structure HOS or conformation of protein based drugs Starting from the very

basics of protein structure this book takes the reader on a journey on how to best achieve this goal using the key relevant and practical methods commonly employed in the biopharmaceutical industry today as well as up and coming promising m
