From Wiley : Vaccine Development and Manufacturing (Wiley Series in Biotechnology and Bioengineering)
atypical as lederberg was at asilomar his optimistic vision of genetic engineering would soon lead to the development

of the biotechnology industry background the development of a safe and effective vaccine against the human immunodeficiency virus type 1 hiv 1 is critical to pandemic control methods in a Vaccine Development and Manufacturing (Wiley Series in Biotechnology and Bioengineering):

Vaccine Manufacturing and Production is an invaluable reference on how to produce a vaccine from beginning to end addressing all classes of vaccines from a processing nbsp production and regulatory viewpoint It will provide comprehensive information on the various fields involved in the production of vaccines from fermentation purification formulation to regulatory filing and facility designs In recent years there have been tremendous advances in a From the Back Cover Invaluable reference on how to produce a vaccine from beginning to end Vaccine production is a major unit of many pharmaceutical companies With several biotechnology companies involved in developing new types of vaccin
