1 of 1 review helpful Does the Job By Miguel Angel I cannot leave 5 stars because it s not the most recent edition I till have to say that regardless that this one is not the most recent it is pretty similar There is not a lot of change between them the most recent edition has a little more stuff in it and is updated to some new findings but the information and

equations in both of them are pretty much the same This text uses a more brief and qualitative approach to present biochemistry with chemical rigor focusing on the structures of biomolecules chemical mechanisms and evolutionary relationships It is written to impart a sense of intellectual history of biochemistry an understanding of the tools and approaches used to solve biochemical puzzles and a hint of the excitement that accompanies new discoveries This edition has been thoroughly updated to reflect the most rec contains a wealth of high class pedagogical features the authors write well and do a fine job in conveying to students the most exciting advances in modern biochemistry Times Higher Education Supplement 24th Feb 2006
