objections to evolution have been raised since evolutionary ideas came to prominence in the 19th century when charles darwin published his 1859 book on the origin of Darwin's Black Box: The Biochemical Challenge to Evolution:

4 of 5 review helpful The author did his research By elgranrafo Thoroughly investigated and incredibly detailed A must in any serious discussion The author also manages to explain complex mechanisms in a manner that increases your knowledge so that when you read the technical portions the average reader can appreciate the majesty of the complexity of systems he explains 0 of 0 review helpful Virtually all serious scientists accept the truth of Darwin's theory of evolution While the fight for its acceptance has been a long and difficult one after a century of struggle among the cognoscenti the battle is over Biologists are now confident that their remaining questions such as how life on Earth began or how the Cambrian explosion could have produced so many new species in such a short time will be found to have Darwinian answers They like most of the re com Michael J Behe a biochemist at Lehigh University presents here a scientific argument for the existence of God Examining the evolutionary theory of the origins of life he can go part of the way with Darwin he accepts the idea that species have been d
