2 of 2 review helpful Good text but requires prior knowledge By eyeBallin I found this text to be well written and very thorough at describing certain biochemical and physiological processes of the eye However even though each chapter has basic introductory information about each topic enzymes carbohydrates lipids etc this should not be used in a setting in which students have not had prior coursework in biochem I This specialized text presents a review of general biochemistry and an in depth exploration of biochemistry unique to the eye As a readable introduction to this

challenging topic it describes the molecular structures and biochemical events that occur in the eye Specific clinical examples link basic science to clinical practice and provide a concrete basis for understanding complex concepts This edition includes new updated information in revised chapters plus two ad My impression of this book was very positive It is well illustrated easy to read and understandable I recommend the book to all students of this area confident that it will give them a solid grounding in the basics along with some specifics of occular bio
