By Alasdair Steven, Wolfgang Baumeister, Louise N. Johnson, Richard N. Perham : Molecular Biology of Assemblies and Machines international journal of molecular sciences an international peer reviewed open access journal the third edition of this authoritative reference work is indispensable to bacterial scientists and invaluable for anyone involved in bacterial cell biology Molecular Biology of Assemblies and Machines:

Molecular Biology of Assemblies and Machines presents a comprehensive narrative describing the structures of macromolecular complexes and how they assemble and interact Richly illustrated it is written for advanced undergraduates graduate students and researchers in biochemistry structural biology molecular biology biophysics cell biology and microbiology and will also appeal to those in chemistry immunology and medicine Essentially all ma

About the Author Wolfgang Baumeister is Director and Head of the Department of Structural Biology at the Max Planck Institute of Biochemistry in Martinsried Germany Baumeister studied biology chemistry and physics at the Universities of M uu
