By Bryan M. Ham : Proteomics of Biological Systems: Protein Phosphorylation Using Mass Spectrometry Techniques sib resources external resources no support from the expasy team databases uniprotkb o functional

information on proteins o introduction some forms of chemical biology attempt to answer biological questions by directly probing living systems at the chemical level in contrast to research Proteomics of Biological Systems: Protein Phosphorylation Using Mass Spectrometry Techniques:

0 of 0 review helpful Sales Review By Shane T French Proteomics of Biological Systems was a great addition to our scientific Library this will help further enhance research area in proteins and mass spectrometry Phosphorylation is the addition of a phosphate PO₄ group to a protein or other organic molecule Phosphorylation activates or deactivates many protein enzymes causing or preventing the mechanisms of diseases such as cancer and diabetes This book shows how to use mass spectrometry to determine whether or not a protein has been correctly modified by the addition of a phosphate group It also provides a combination of detailed step by step methodology for ph From the Back Cover Obtain protein phosphorylation knowledge using mass spectrometry techniques A practical introduction to mass spectrometry ndash based phosphoproteomic studies this book addresses various concepts including the protocols necessary for sampl
