design the preclinical assessment of adcs must newsletter with articles on current research finds industry news job listings and event schedules includes sign up form and information about the company Development of Antibody-Based Therapeutics: Translational Considerations:

Translational strategies for development of antibody based therapeutics should allow understanding of the relationship between the 'unit dose' and 'unit effect' with respect to both beneficial and deleterious effects from early stages of development The flow of information from later to earlier stages of development should provide opportunities to facilitate selection of more effective novel and next generation drug candidates Selection and eval From the Back Cover Development of Antibody Based Therapeutics Translational Considerations examines important considerations necessary for the design of effective translational strategies during the development of antibody based therapeutics Translatio
