including conservation and green politics is a diverse scientific social and Understanding Environmental Health: How

We Live in the World:

2 of 2 review helpful Great overview of the field of Environmental Health By AK Drake I used this textbook for the environmental health core class at my school of public health and found it to be excellent probably one of the best textbooks I've seen in 25 years of graduate school I had the advantage of having the author as my instructor but even without Dr Maxwell teaching the course the book would have been just as This innovative text takes a unique approach to presenting environmental health Rather than organizing topics around the traditional regulatory fields air and water pollution hazardous wastes radiation etc this book is structured around the choices we make as individuals and societies that result in environmental health hazards The author details the hazards of energy production industry food production and the modern lifestyle while exploring our place with
