From Springer : Nutrient Regulation during Pregnancy, Lactation, and Infant Growth (Advances in Experimental Medicine and Biology) introduction vitamin a is an essential micronutrient whose role in visual

function has been known for thousands of years the role vitamin a plays in malnutrition protein energy malnutrition malnutrition protein energy malnutrition protein energy malnutrition pem may be present at any time during the life Nutrient Regulation during Pregnancy, Lactation, and Infant Growth (Advances in Experimental Medicine and Biology):

Almost every aspect of energy and nutrient metabolism is altered by hormonal and other physiological changes during pregnancy and lactation While it is evident that hormonal adjustments affect nutrient requirements these are rarely considered when nutrient recommendations are made for pregnant or lactating women and often neglected during evaluation of nutritional status In addition changes in nutrient metabolism during the stages of pregnancy and of lactation
