From Ingramcontent : Bioluminescent Imaging: Methods and Protocols (Methods in Molecular Biology) frster resonance energy transfer fret fluorescence resonance energy transfer fret resonance energy transfer ret or electronic energy transfer eet is a dna and rna extraction plasmid purification reporter assays pcr qpcr cloning enzymes cell

viability assays apoptosis detection systems luminometers protein Bioluminescent Imaging: Methods and Protocols (Methods in Molecular Biology):

Yet another contribution to the highly successful Methods in Molecular Biology series this guide to the techniques of bioluminescent imaging has stepwise protocols on cutting edge methods widely used in research and medicine to track biological processes From the reviews ldquo The intent is to provide diverse group of techniques to everyone interested in implementing bioluminescence based imaging regardless of their level of experience with such methodologies These are very worthy objectives and the book su
