From L I Simandi : Advances in Catalytic Activation of Dioxygen by Metal Complexes (Catalysis by Metal Complexes) 46 th world chemistry congress 40 reunio anual da sociedade brasileira de qumica july 9 to 14 2017 so paulo brazil iupac 49 th general assembly vellaisamy sridharan was born in tamil nadu india he received bsc and msc chemistry degrees together with a gold medal for university first rank in msc from Advances in Catalytic Activation of Dioxygen by Metal Complexes (Catalysis by Metal Complexes):

The subject of dioxygen activation and homogeneous catalytic oxidation by metal complexes has been in the focus of attention over the last 20 years The widespread interest is illustrated by its recurring presence among the sessions and subject areas of important international conferences on various aspects of bioinorganic and coordination chemistry as well as catalysis The most prominent examples are ICCIC ICBIC EUROBIC ISHC and of course the ADHOC series of meeting Three of these topics focus heavily on biomimetic oxidations and how they might be applied to catalysis of organic compounds Each is very well written and the material is thoroughly reviewed It will be of great interest to the specialist in catalytic oxidat
