By Paul Gustafson : Bayesian Inference for Partially Identified Models: Exploring the Limits of Limited Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) Bayesian Inference for Partially Identified Models: Exploring the Limits of Limited Data (Chapman & Hall/CRC Monographs on Statistics & Applied Probability):

Bayesian Inference for Partially Identified Models Exploring the Limits of Limited Data shows how the Bayesian approach to inference is applicable to partially identified models PIMs and examines the performance of Bayesian procedures in partially identified contexts Drawing on his many years of research in this area the author presents a thorough overview of the statistical theory properties and applications of PIMs The book fi hellip In this little gem of a monograph Paul Gustafson hellip argues that partially identified models should not be so quickly dismissed hellip Gustafson has drawn together many discussions of identifiability from previous Bayesian analyses includi
