By Judit E. Puskas : Introduction to Polymer Chemistry: A Biobased Approach department of polymer chemistry zernike institute for advanced materials university of groningen nijmegen 4 9747 ag groningen the netherlands scrivener publishing publishes books and chapter length technical applied science materials for engineers technicians and academic researchers Introduction to Polymer Chemistry: A Biobased Approach:

Designed for polymer and materials engineering students the text introduces polymer chemistry through polymers found in nature It explains biobased polymer systems and synthetic systems by exploring the chemistry of natural polymers from plants and animals as well as self assembled macromolecular structures including proteins lignin protamers and fibers Also covered are synthetic polymerization and emerging advances in green polymer chemistry including detailed About the Author Judit E Puskas Ph D Professor University of Akron
