Blood science has become a cornerstone of multiple disciplines including clinical chemistry disease diagnosis and therapeutic monitoring Over the past decade we have witnessed the advent of increasingly powerful proteomics technologies that allow greater fundamental insights into the blood proteome These technological improvements have in part fuelled the quest for the discovery of novel blood based biomarkers of disease Serum Plasma Proteomics From the Back Cover Blood science has become a cornerstone of multiple disciplines including clinical chemistry disease diagnosis and therapeutic monitoring Over the past decade we have witnessed the advent of increasingly powerful proteomics technol
