By Christopher T Walsh, Yi Tang : Natural Product Biosynthesis: Chemical Logic and Enzymatic Machinery
abstract o introduction o antimicrobial activity of a nasal commensal o lugdunin a novel peptide antibiotic o activity against major human pathogenso amino acids are organic compounds containing amine nh 2 and carboxyl cooh

functional groups along with a side chain r group specific to each amino acid Natural Product Biosynthesis: Chemical Logic and Enzymatic Machinery:

Authored by leading experts in the enzymology of natural product biosynthesis this textbook provides a thorough description of the types of natural products the biosynthetic pathways that enable the production of these molecules and an update on the discovery of novel products in the post genomic era Although some 500 600 000 natural products have been isolated and characterized over the past two centuries there may be a 10 fold greater inventory awaiting immedi From the Back Cover Authored by leading experts in the enzymology of natural product biosynthesis this textbook provides a thorough description of the types of natural products the biosynthetic pathways that enable the production of these molecules and an up
