By E. Pretsch, P. Bühlmann, C. Affolter : Structure Determination of Organic Compounds: Tables of Spectral Data

analytical chemistry structure determination of organic compounds tables of spectral data e pretsch p bhlmann m badertscher database of organic chemistry compounds organized by species contains chemical and physical property data on over 30000 compounds Structure Determination of Organic Compounds: Tables of Spectral Data:

1 of 1 review helpful A useful collection of data numbers and examples By Natasha Varvogli I ordered this book because I was having a hard time evaluating NMR spectras I collected preparing my PhD thesis The book contains an amazing amount of information in great detail It supplies you with table data you can use to predict shifts of protons and carbons It also contains many examples about natural products in general s This volume presents in the form of texts tables charts and graphs a modern compilation of spectroscopic reference data for IR UV Vis ¹H and ¹³C NMR MS incl prototype spectra of almost every important class of organic compounds and spectra of MALDI and FAB matrix materials and is intended as a short textbook and a hands on guide for interpreting experimental spectral data and elucidating the chemical structure of the respective compound behind it The concise te The book begins with correlation tables for H and C NMR IR UV and MS The mass spectrometry sections includes common fragments absolute masses isotopes and isotope patterns of all the natural elements and halogen combinations The next section contains co
