By Vicente Gilsanz, Osman Ratib : Hand Bone Age: A Digital Atlas of Skeletal Maturity bone age is the degree of maturation of a child's bones as a person grows from fetal life through childhood puberty and finishes growth as a young adult the bones undergo a social change issn 2224 4131 depository legal 2005 5822 5 therefore the aim of the present

study was to evaluate bone age by Hand Bone Age: A Digital Atlas of Skeletal Maturity:

0 of 0 review helpful The images in the book don't look anything like that on the iPad of a colleague By bluewater3
Bought the book as I don't have an iPad The images in the book don't look anything like that on the iPad of a colleague
The images are not clear and it is difficult to make out bony details The book is not worth buying 0 of 0 review helpful
Four Stars By octav In the past determination of bone maturity relied on visual evaluation of skeletal development in
the hand and wrist most commonly using the Greulich and Pyle atlas The Gilsanz and Ratib digital atlas takes
advantage of digital imaging and provides a more effective and objective approach to assessment of skeletal maturity
The atlas integrates the key morphological features of ossification in the bones of the hand and wrist and provides
idealized sex and age spec
