From S. Karger : Mathematical Modeling and Computer Simulation in Blood Coagulation (Pathophysiology of Haemostasis and Thrombosis) Mathematical Modeling and Computer Simulation in Blood Coagulation (Pathophysiology of Haemostasis and Thrombosis):

Special Topic Issue Pathophysiology of Haemostasis and Thrombosis 2005 Vol 34 No 2 3 Blood coagulation a

complex system of enzymatic reactions responsible for hemostasis and thrombosis has recently become a focus of active theoretical research This publication is a first attempt to bring together mathematical modeling and computer simulation studies of various aspects of the coagulation system reported by leading laboratories in this field A wide area of coagul
